Project Title	eBook Reader
Document	DASS Project Concept Document
Creation date	31/1/21
Created By	Abhijeeth Singam, Ainesh Sannidhi, Aryan Jain, Palash Sharma
Client	Product Labs

Description

The eBook reader is a general eBook reader with added functionalities designed to assist people who struggle with English or with reading in general. It serves to translate a given book into one of many languages and read the book aloud to assist the user. The reader also aims to be blind-friendly and have voice commands for the main features of the application.

Profile of Users

Foreseen Users:

1. Non-Blind Users: Can read an eBook with ease and will mainly use the webapp for translation and reading of eBooks.
2. Blind Users: Can use the voice commands to have the book read out to them.

All users are expected to be able to use computers well enough to access and use the webapp given instructions regarding the same.

Usage Model and Diagrams (if any)
